

Patient data Please be sure to provide your address (**Large block letters**)

Name, first name, address: _____ Birth date: _____

For children invoice to: _____ name, first name

Date of sample collection: _____ Ward: _____

Phone number for queries: _____

Male Female Diverse Cycle length: _____ (e.g. 28 days) Cycle day: _____
(Only relevant for hormone testing)

Signature: _____ patient or legal representative

Address for report (Practice)

Name, first name, practice address (*Practice stamp*): _____

Please send invoice to: Therapist Patient

Please also send a copie of report to the patient (costs 0,50 €/page)

Please note: We bill our services privately. Coverage of costs by satutory and private insurers cannot be guaranteed. For not free shipment (within Germany) we charge the respective postage costs in addition to the prices listed. For samples from Switzerland there is a shipping surcharge of 15,00 €.

Please mark the requested tests clearly with a cross.

Stool examinations	
Parameters	Fee (€)
Stool flora	
<input type="checkbox"/> Stool flora, incl. fungi and pH value	69,52
<input type="checkbox"/> Only fungi, pH value	24,81
<input type="checkbox"/> Fungal differentiation, per isolate	16,76
<input type="checkbox"/> Antimycogram, per isolate	8,05
<input type="checkbox"/> Stool flora + histamine producers	94,33
<input type="checkbox"/> Stool flora + NDH clostridia	103,04
Microbiome analyses (molecular biological)	
<input type="checkbox"/> Akkermansia muciniphila ¹⁾ + Faecalibacterium prausnitzii ¹⁾	99,09
<input type="checkbox"/> Intestinal microbiome ¹⁾	186,54
Intestinal flora activity	
<input type="checkbox"/> Fecal fatty acid profile ¹⁾	71,70
Local immune status	
<input type="checkbox"/> Secretory immunoglobulin A	10,05
<input type="checkbox"/> β-Defensin-2 ¹⁾	27,98
Digestion parameters	
<input type="checkbox"/> Digestion residues	14,57
<input type="checkbox"/> If digestion residues are noticeable, further diagnostics are necessary	
<input type="checkbox"/> Pancreatic elastase 1	29,38
<input type="checkbox"/> Fat ¹⁾	23,90
<input type="checkbox"/> Nitrogen ¹⁾	16,76
Bile acid loss syndrome	
<input type="checkbox"/> Bile acids ¹⁾	19,44
Leaky gut markers	
<input type="checkbox"/> Alpha 1-antitrypsin	16,79
<input type="checkbox"/> Zonulin (from stool) ¹⁾	32,18
Inflammation markers	
<input type="checkbox"/> PMN elastase ¹⁾	19,44
<input type="checkbox"/> Lysozyme ¹⁾	8,05
<input type="checkbox"/> Lactoferrin ¹⁾	29,38
<input type="checkbox"/> Calprotectin ¹⁾	29,38
<input type="checkbox"/> EDN/EPX ¹⁾	29,38
Enteritis pathogens	
<input type="checkbox"/> Salmonella/Shigella	18,66*
<input type="checkbox"/> Yersinia sp.	19,83*
<input type="checkbox"/> Campylobacter sp.	23,32*
<input type="checkbox"/> Clostridioides difficile + Toxins	33,52
<input type="checkbox"/> Noro-virus	16,76
<input type="checkbox"/> Adeno-virus + Rota-virus	33,52
Parasites	
<input type="checkbox"/> Parasites (Protozoa, worms, microscopic)	39,18
<input type="checkbox"/> Protozoa (PCR)	99,09
<input type="checkbox"/> Giardia propagation protein	16,76
<input type="checkbox"/> Pinworm eggs (separate kit for anal tape test required)	8,05

Stool examinations	
Parameters	Fee (€)
Enterosan® Junior (infants and young children)	
<input type="checkbox"/> Stool flora (from 1 week) incl. fungi/pH value	69,52
<input type="checkbox"/> Alpha 1-Antitrypsin (from 2 weeks)	16,79
<input type="checkbox"/> Secretory immunoglobulin A (from 9 months)	10,05
Gastritis pathogens	
<input type="checkbox"/> Helicobacter pylori (Immunological detection in stool)	34,19
Gluten intolerance	
<input type="checkbox"/> Anti-Gliadin-sIgA ¹⁾ + Anti-Transglutaminase-sIgA ¹⁾	59,46
Histaminose	
<input type="checkbox"/> Histamin ¹⁾	32,18
Colorectal cancer screening	
<input type="checkbox"/> Colorectal cancer check ¹⁾	50,09
<input type="checkbox"/> Tumor M2-PK ¹⁾	27,98
<input type="checkbox"/> Hemoglobin-haptoglobin ¹⁾	12,06
<input type="checkbox"/> Serum albumin ¹⁾	10,05
Vagichcek®	
Vaginal flora Pregnant? <input type="checkbox"/> Yes <input type="checkbox"/> No	
Interpretation only possible after puberty	
<input type="checkbox"/> Vaginal flora (2 swabs required!) pH 4,0 4,4 4,7 5,0 5,3 5,5 5,8 7,0	69,52
<input type="checkbox"/> Fungi only	24,81
<input type="checkbox"/> Vaginosis-index (1 additional swab)	16,76
Only in combination with vaginal flora or examination for fungi:	
<input type="checkbox"/> Fungal differentiation, per isolate	16,76
<input type="checkbox"/> Aromatogram (bacteria, fungi), per isolate	16,20
<input type="checkbox"/> Up to 3 isolates otherwise please contact us per telephone	max. 48,60
<input type="checkbox"/> Antibiogram, per isolate	14,57
<input type="checkbox"/> Antimycogram, per isolate	8,05
Food intolerances	
Specific IgG (serum/blood)	
<input type="checkbox"/> IgG basic profile ¹⁾ (40 allergens)	167,60
<input type="checkbox"/> IgG additional profile ¹⁾ (80 additional allergens)	247,69
<input type="checkbox"/> IgG total profil ¹⁾ (120 allergens)	415,29
Breathing gas test (hydrogen and methane)	
<input type="checkbox"/> Lactose intolerance	59,30
<input type="checkbox"/> Fructose malabsorption	59,30
<input type="checkbox"/> Sorbitol intolerance	59,30
<input type="checkbox"/> Small intestinal overgrowth (SIBO)	59,30

* If pathogens are detected, additional costs for differentiation and – if necessary – resistance testing

Hormones from saliva	
Parameters	Fee (€)
Hormones (see back page for sampling times)	
♀ Please specify: cycle length and cycle day	
<input type="checkbox"/> DHEA (A)	23,46
<input type="checkbox"/> Testosterone (A)	23,46
<input type="checkbox"/> Progesterone (A)	23,46
<input type="checkbox"/> 17beta oestradiol (A)	23,46
<input type="checkbox"/> Cortisol day profile (A + B)	83,80
<input type="checkbox"/> Cortisol at night (C)	16,76
<input type="checkbox"/> Melatonin at night (C)	32,18
⚠ Interpretation only possible after puberty	

Microbiological diagnostics	
Urine culture	
<input type="checkbox"/> Bacteria and fungi	16,32*
Skin (without Dermatophytes)	
<input type="checkbox"/> Swab <input type="checkbox"/> Scrape (for skin fungi)	
Localization: _____	
<input type="checkbox"/> Bacteria (aerobic)	9,32*
<input type="checkbox"/> Fungi (swab), without skin fungi	7,00*
<input type="checkbox"/> Fungi (scraping), with skin fungi	21,00*
Head and respiratory tract (swabs)	
<input type="checkbox"/> Mouth <input type="checkbox"/> Tongue <input type="checkbox"/> Throat <input type="checkbox"/> Saliva	
<input type="checkbox"/> Nose <input type="checkbox"/> Ear <input type="checkbox"/> Eye <input type="checkbox"/> Sputum	
<input type="checkbox"/> Others: _____	
<input type="checkbox"/> Bacteria (aerobic, microaerobic)	27,39*
<input type="checkbox"/> Fungi	7,00*
Wound swab	
<input type="checkbox"/> Bacteria (aerobic, microaerobic)	45,46*
<input type="checkbox"/> Fungi	7,00*
Urogenital tract (Swab)	
<input type="checkbox"/> Urethra <input type="checkbox"/> Penis <input type="checkbox"/> Semen	
<input type="checkbox"/> Bacteria (aerobic, microaerobic)	23,89*
<input type="checkbox"/> Fungi	7,00*
*Germ differentiation (add. costs)	
Bacteria, per isolate	14,57
Fungi, per isolate	16,76
*Resistance test (add. costs)	
<input type="checkbox"/> Antibiogram, per isolate	14,57
<input type="checkbox"/> Antimycogram, per isolate	8,05
<input type="checkbox"/> Aromatogram, per isolate	16,20

Stool test profiles	Fee (€)
<input type="checkbox"/> Basic intestinal check Stool flora, incl. fungi and pH value + digestive residues + alpha 1-antitrypsin + secretory immunoglobulin A	110,93
<input type="checkbox"/> Premium intestinal check Stool flora, incl. fungi and pH value + histamine producers + digestive residues + pancreatic elastase 1 + alpha 1-antitrypsin + zonulin ¹⁾ + secretory immunoglobulin A + calprotectin ¹⁾ + lactoferrin ¹⁾ + bile acids ¹⁾ + hemoglobin-haptoglobin ¹⁾ + serum-albumin ¹⁾ + tumor M2-PK ¹⁾	325,59
<input type="checkbox"/> „Irritable bowel syndrome“ (unclear intestinal complaints such as constipation and/or meteorism) Stool flora, incl. fungi and pH value + histamine producers + digestive residues + pancreatic elastase 1 + alpha 1-antitrypsin + zonulin ¹⁾ + secretory immunoglobulin A + calprotectin ¹⁾ + lactoferrin ¹⁾ + bile acids ¹⁾ + anti-gliadin-sIgA ¹⁾ and anti-transglutaminase-sIgA ¹⁾ + Helicobacter pylori	369,15
<input type="checkbox"/> Allergic forms (e.g. neurodermatitis, atopic rhinitis, asthma)** Stool flora, incl. fungi and pH value + histamine producers + digestive residues + alpha 1-antitrypsin + zonulin ¹⁾ + secretory immunoglobulin A	167,92
<input type="checkbox"/> Chronic inflammatory diseases (e.g. rheumatoid forms, periodontitis) Stool flora, incl. fungi and pH value + alpha 1-antitrypsin + zonulin ¹⁾ + secretory immunoglobulin A + PMN-elastase ¹⁾ + calprotectin ¹⁾ + lactoferrin ¹⁾ + bile acids ¹⁾	226,18
<input type="checkbox"/> Acute diarrhea Stool flora, incl. fungi and pH value + calprotectin ¹⁾ + lactoferrin ¹⁾ + bile acids ¹⁾ + Salmonella/Shigella + Yersinia sp. + Campylobacter sp. + Clostridioides difficile and toxins + noro-virus + adeno- and rotavirus + parasites	332,51*
<input type="checkbox"/> Chronic diarrhea Stool flora, incl. fungi and pH value + digestive residues + pancreatic elastase 1 + secretory immunoglobulin A + PMN-elastase ¹⁾ + calprotectin ¹⁾ + lactoferrin ¹⁾ + bile acids ¹⁾ + anti-gliadin-sIgA ¹⁾ and anti-transglutaminase-sIgA ¹⁾	280,62
<input type="checkbox"/> Chronic recurrent infections Stool flora, incl. fungi and pH value + digestive residues + alpha 1-antitrypsin + zonulin ¹⁾ + secretory immunoglobulin A + β-Defensin-2 ¹⁾	171,09
<input type="checkbox"/> Colon cancer screening Stool flora, incl. fungi and pH value + NDH-clostridia + fecal fatty acid profile ¹⁾ + calprotectin ¹⁾ + bile acids ¹⁾ + hemoglobin-haptoglobin ¹⁾ + serum-albumin ¹⁾ + tumor M2-PK ¹⁾	273,65

Hormones from saliva tests based on symptom complexes		⚠ Interpretation only possible after puberty
Panel	Complex of symptoms	Sampling-time(s) Fee (€)
<input type="checkbox"/> 1	Burnout, fatigue, lack of motivation in the morning, susceptibility to stress, weight problems, depression, menopausal symptoms, osteoporosis Cortisol daily profile + DHEA + testosterone + progesterone + 17β-oestradiol	A + B 177,64
<input type="checkbox"/> 2	Susceptibility to infections, gynecomastia, libido disorders, potency problems, control during hormone replacement, cardiovascular diseases, skin and hair problems DHEA + testosterone + progesterone + 17β-oestradiol	A 93,84
<input type="checkbox"/> 3	Menstrual problems, prostate problems, unfulfilled desire to have children (man + woman, woman: cycle day 13 and/or cycle day 20), myoma, cycle disorders after discontinuing contraceptives Testosterone + progesterone + 17β-oestradiol	A 70,38
<input type="checkbox"/> 4	Premenstrual syndrome (sampling during PMS problems) Progesterone + 17β-oestradiol	A 46,92
<input type="checkbox"/> 5	Sleep disorders Cortisol and melatonin 3h after going to bed or waking up at night	C 48,94
